

EcoCommand, A Galactic Guardian Adventure

by Larry K. Elmore

The war for saving the planet just got personal.

After his scientist mother is killed in a suspicious hit-and-run, a grieving 15-year-old tech prodigy is recruited into a clandestine global organization of eco-warriors, only to discover that the man hunting his father is the same man who murdered his mother.

Introduction

EcoCommand is a one-hour serialized action-adventure that blends the grounded, high-stakes environmentalism of Homeland with the coming-of-age wonder and found-family dynamics of Stranger Things. It is a story about legacy, loss, and the fight for our planet's future, centered on a young hero who must use his intelligence and his mother's research to stop a ruthless bio-terrorist and heal his fractured family. Set against a backdrop of cutting-edge technology and ancient mysticism, EcoCommand is a franchise-ready series that explores the cost of dedication and the enduring power of hope.

Act 1 - The Discovery - Grief is the beginning. The truth is the mission.

In the wake of his mother's tragic death, 15-year-old tech prodigy ROBBIE HENRY is adrift in a sea of grief. His estranged father, SCOTT, a ghost for most of his life, is a Ranger in a secret war against eco-terrorism. After Robbie discovers a hidden, encrypted message from his mother warning him that her "accidental" death was no accident, he is intercepted by WALKER RHODES, a Galactic Guardian, and mysterious guide who offers him a choice: stay in his broken world, or follow his father down the rabbit hole and learn the truth. Robbie chooses the truth.

Act 2 - The Initiation - A city hidden under a mesa. A father hidden behind a wall.

Robbie is taken to WESCOM, a clandestine city hidden inside a defunct Colorado oil shale mine, where the world's best scientists and soldiers fight a covert war to save the planet. He is reunited with his father, but the reunion is fraught with years of resentment and unspoken grief. Scott sees a boy he failed to protect; Robbie sees a man who chose the world over his family. As Robbie is introduced to the wonders of WESCOM—its quantum AI, holographic training, and global mission—he begins to understand the scale of his father's sacrifice and the legacy his mother left behind.

Act 3 - The Revelation - The enemy has a name. The hunt is just beginning.

As Robbie begins his training, he must prove himself to his peers, earning the respect of both the jocks on the basketball court and the prodigies in the simulation lab. He discovers his mother's research is the key to WESCOM's security, and his unique interdisciplinary thinking makes him a valuable asset. While digging into the files on his mother's death, he uncovers a shocking connection: the hit-and-run was orchestrated by CHEN, a ruthless bio-terrorist and his father's nemesis. The mission to save the world has just become a mission for revenge.

Act 4 - The Mission - He saved the team. But the real enemy got away.

Robbie joins his father's Alpha Team on a high-stakes mission to San Francisco to stop Chen from selling a cache of endangered species DNA to a bio-weapons developer. From the surveillance van, Robbie and tech specialist JAKE KERSEY must navigate Chen's sophisticated security system, which Anna's research exposes a flaw in the system. When the team is trapped, Robbie must interface with 8-BALL, WESCOM's quantum AI, to find a backdoor. In a tense climax, Robbie saves the team, but Chen escapes, taunting Robbie that he knows he's watching and will be ready for him.

Act 5 - The Beginning - A son finds his purpose. A father finds his son.

In the aftermath, the mission is a partial success: the DNA is recovered, but Chen is gone. In a quiet moment of reconciliation, Scott acknowledges his son's brilliance and courage, and they agree to hunt Chen together. Guided by the Lakota mentor GREY WOLF, Robbie undertakes a vision quest and discovers his spirit animal—the crow, a symbol of intelligence and transformation, the same guide as his father. The pilot ends with Scott and Robbie beginning their training together, no longer just father and son, but partners in the war for the planet's future.

The End of the Beginning.
